

Entry

The Next Generation of Door Entry

Smart Audio/Video Door Entry System

What is Entry?

Entry is Paxton's award winning door entry solution; a simple security solution that allows you to identify and authorise a visitor before they can access your premises.

Simple

The Entry system comprises three simple components; external panel, door control unit and internal monitor handset. On approaching your building, visitors call via the bell button on the external panel. Once you have recognised the caller via the full colour, smart audio/video monitor, you can grant or deny access as appropriate.

Smart

Entry comes with a built-in video voicemail facility and is fully SIP compatible meaning you can answer your door via a desk phone, PC or smart device, so you never miss a call.

The system is extremely easy to use and comes in two stylish and discreet panel designs. Choose from the smart, anthracite grey standard panel or the robust vandal resistant, stainless steel version.

Flexible

Entry also comes with Paxton's leading access control system, Net2, built in offering a flexible and high security solution.

Access control allows you to conveniently manage and secure your building in a cost effective way and sits perfectly alongside door entry. Say goodbye to large bunches of keys; instead electronic tokens can be issued to allow access through the controlled areas and doors. These tokens are easily barred from the system if they are lost, stolen, or not returned.

*Winner of the PSi Premier award, Access Control Product of the Year; 2013, 2014, 2015

Entry in your building

Simple to build, just three components:

Monitor, Panel and Door Controller

Fully SIP compatible - answer the door from a SIP enabled phone, tablet or PC

Install with minimal disruption – can connect directly into your building's network

Camera can be adjusted on installation to ensure clear view of visitors

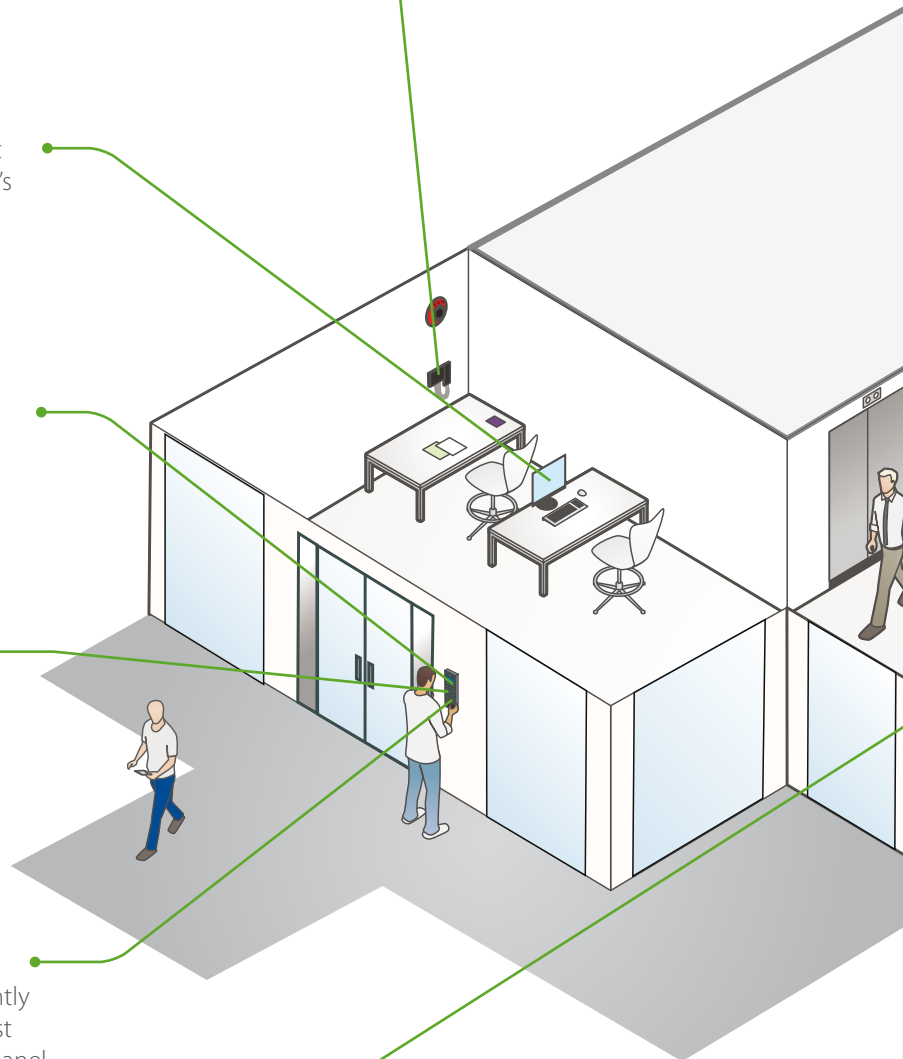

Reads Paxton and MIFARE® token technology - offering a wider range of card and token types to open your door

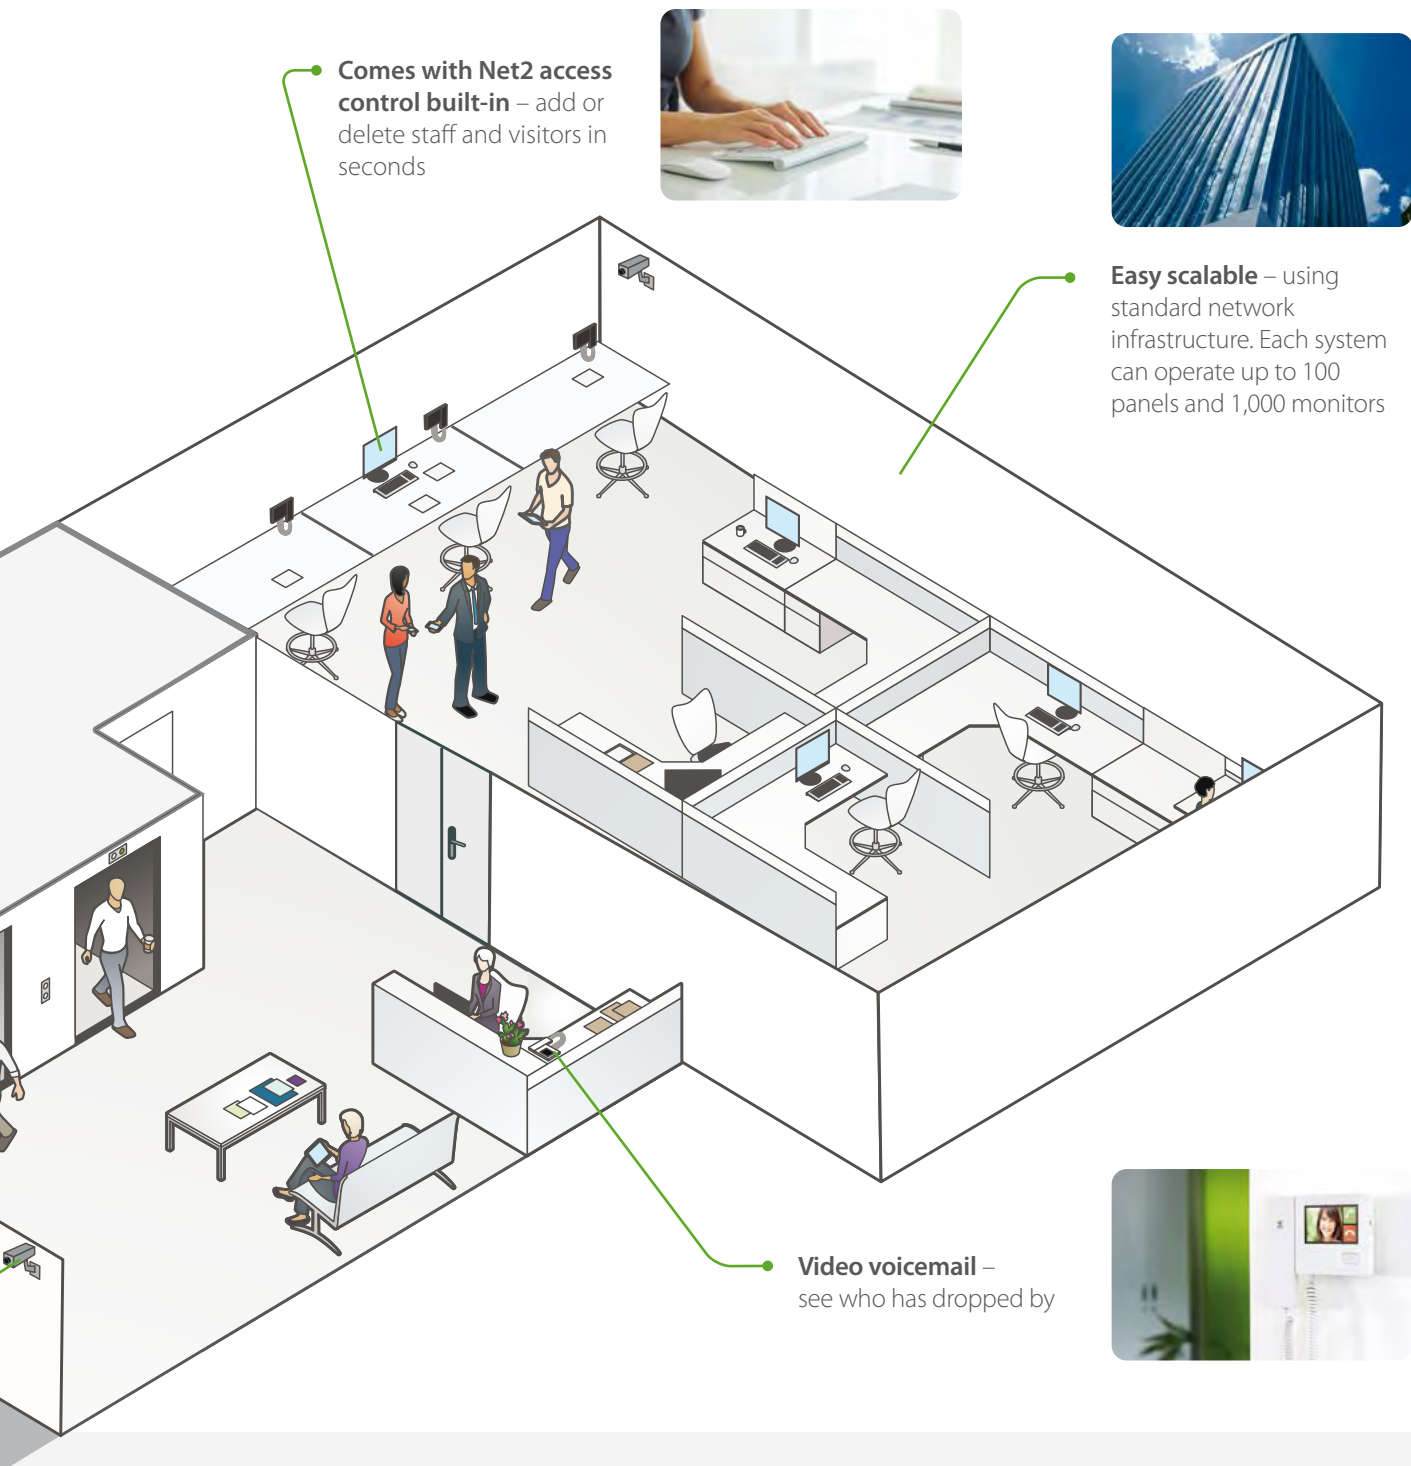

Vandal resistant panel (IK10 rating) – independently tested, offering the highest impact resistance of any panel

Secondary camera integration for increased security

Comes with Net2 access control built-in – add or delete staff and visitors in seconds

Easy scalable – using standard network infrastructure. Each system can operate up to 100 panels and 1,000 monitors

Video voicemail – see who has dropped by

Add Net2 access control for smarter building management

When integrating Entry with Net2 access control, your system moves beyond the basics of managing the flow of people around a building, offering benefits such as:

- **System integration** – CCTV, intruder alarm, fire alarm and lift control
- **Building control** – manage your site remotely via your smartphone or set the system to control power to utilities, saving you money on energy bills
- **Wireless security** – add a battery powered, wireless door controller for a convenient and economical way to secure internal doors
- **High security** – lockdown your building at the touch of a button

Entry is easy to use and comes in a stylish, discreet design, offering a flexible and high security solution that suits a range of environments.

Public Sector

- Banks and finance buildings
- Government buildings
- Prisons and young offender institutions

Healthcare

- Hospitals
- Care homes
- Mental health units
- Surgeries

Residential

- Private apartments
- High-end complexes
- Multi-tenant buildings
- Vehicle access

Schools and Universities

- Reception areas
- Halls of residence
- Staff rooms and offices

Commercial

- Private offices
- Factories
- Vehicle access

Sheltered Accommodation

- Youth hostels
- Retirement homes

Leisure

- Hotels
- Gyms and health clubs

Use Entry without a network

If you require a video door entry system that just works without connection to a network or server then Entry could be a quick and simple solution for you. By utilising Entry in Standalone the system can grow with your requirements, with no hidden costs.

- Straightforward token-based access control
- Simple user management and intuitive interface
- Combine with Paxton's other standalone products to create a simple system

Paxton

Entry

Your Complete Door Entry Solution

Introducing our new audio monitor, the latest addition to the Entry range. Joining our premium and vandal resistant products, the Entry Audio monitor provides a cost-effective option, offering more versatility from the system. With a sleek, contemporary design, the new monitor will fit discreetly into any surroundings.

The audio monitor fully supports all Entry functionality, making it the ideal solution where video is not required.

Benefits of Entry:

Flexibility built in

- Works standalone or as part of a networked access control system to grow with your site requirements
- Compatible with Net2 and PaxLock Pro for a complete solution
- Reads Paxton, MIFARE® and HID™ 125kHz Proximity tokens*
- Highly scalable, allowing expansion of up to 100 panels and 1,000 monitors

Versatile solution for a range of sites

- Create custom solutions with the full Entry range
- Premium and cost-effective product options available
- Robust solution with vandal resistant panels

Quick and easy installation

- Just 3 components: monitor, panel and door controller, auto detect on setup
- True plug and play solution for simple, time saving installation
- IPV6 and PoE technology for easy expansion

Premium features with no extra cost

- Concierge management, simple caller and site management**
- Two-way video; with the premium monitor and touch panel
- Greater personalised experience with the premium monitor and panel – add logos, images and backgrounds

User friendly and accessible

- Quick visitor verification and day-to day access for users who have a token, PIN or code
- Simple integration with doorbell input
- Line-out for use with T-Loop antenna for users with hearing aids

* With activation of Genuine HID Technology™

** Requires minimum one premium monitor to function as concierge station

Entry Standard Monitor

Introducing the next generation standard monitor, a versatile door entry monitor that offers a feature rich and cost-effective solution for a range of applications. Compatible with Paxton10 and Net2 systems, as well as working as part of a standalone door entry solution, the new Entry Standard monitor is the ideal choice for any building.

The new Entry Standard monitor replaces the previous Entry monitor in our door entry portfolio.

✓ Enhanced User Experience

- Clear user interface on a 4.3" capacitive touch screen
- Excellent audio quality, full-duplex voice communication with echo cancellation
- High contrast screen ensures monitor is easy to read
- Line-out for use with T-Loop antenna for users with hearing aids**

★ Contemporary Design

- Smart, sleek design to fit discreetly into any surroundings
- Personalised experience with 14 theme designs
- Premium user interface with call and event log

↑ Next Generation Technology

- More features, new look, better price
- Compatible with concierge management*
- Action buttons for additional functionality, open secondary doors or unlock an external gate
- Call snapshot captures an image of missed visitors

↕ Ultimate Versatility

- Compatible with our Paxton10 and Net2 systems, also works as part of a standalone solution
- Simple wall mounting or can be used with a desk stand, sold separately
- Available with or without a handset
- Ideal for a range of premises; schools, hospitals, offices, and apartments

📦 Undeniably Simple

- Quick & easy installation – a true plug & play solution
- Intuitive user interface
- Quick visual verification of visitors
- Simple integration with doorbell input

*When used with the Entry Premium monitor.
The Entry Standard monitor cannot function as the concierge monitor.
** Antenna must be purchased separately from a third-party
