

AED Protective Cabinets

PRODUCT OVERVIEW

These AED Protective Cabinets allow AED units to remain protected but still highly visible in the event of an emergency. They mount on the wall enabling appliances to be stored in a central location and are capable of housing CPR accessories. These cabinets are secured with a thumb lock, allowing instant access. To further protect against misuse, vandalism and accidental damage, these models are fitted with a sounder and strobe light, drawing immediate attention to the area.

HOW IT WORKS

External mounting tabs allow the enclosures to be easily installed on to any wall surface, providing protection without the need to change the location of the equipment. They come complete with mounting accessories, tamperproof screws, wire shelf and a coated steel internal mounting backplate.

KEY FEATURES

General Information

- AED Protective Cabinets help protect against misuse and keep the AED's protected and in working order.
- Three year guarantee against breakage of polycarbonate in normal use (one year on electromechanical and electronic components).

Design

- Robust protective cabinet protects AED's located in public areas where there is a history of misuse of the equipment.
- AED Cabinets supplied with Thumb Lock to allow instant access to the device in the event of an emergency.

Construction

- Tough UV-stabilised polycarbonate housing can withstand the severest of knocks.

Installation

- External mounting tabs allow the enclosure to be easily installed on to any wall surface.
- Complete mounting accessories and tamperproof screws are provided.
- Supplied with coated steel internal mounting backplate and wire shelf as standard.
- Polycarbonate tested -40°C (-40°F) to 49°C (120°F).

Options

- Choice of 95dB audible siren alarm or a 100dB strobe/siren with flashing beacon, both powered by a 9V PP3 battery.
