

Engineer Carry Bag DB1 / Engineer Pole Bag DP1

Engineered protection meets smart storage—keep your pole and essential tools safe, organised, and ready to perform wherever the job takes you.

The Engineer Pole Bag is purpose-built to protect your testing pole during transport and storage, while the durable Carry Bag is designed for Detectasmoke® and Detectahead® heat and CO detector testing equipment. With dedicated compartments for head units, battery batons, chargers, and aerosols, the Carry Bag provides a compact, organised solution for engineers and technicians on the move. Together, they offer complete, professional protection for every part of your testing kit.

See next page for Technical Specification.
