What's new

Date	Description	Revision
July 2025	Updated to support HID Linq On Premise software version v1.3.0.	A.1

A complete list of revisions is available in **Revision history**.

1.1 Scope

These release notes provide information on HID® Linq™ On Premise release 1.3.0.37.

HID Linq On Premise is a server-based application installed on the users premises enabling the configuration and firmware update of multiple HID Signo™ readers via controller or serial connection. HID Origo™ connection is optional.

There are two main components in this release:

Component	Version
HID Linq On Premise (HID Origo based service)	1.3.0.37
HID Linq Gateway (installed on Windows OS)	1.3.0.6

1.1.1 Related documentation

The *HID Linq On Premise User Guide* (PLT-08128) is available for download from:

https://www.hidglobal.com/products/linq

1.2 New features and enhancements

The following updates have been added to expand the feature set and improve user experience.

- Added support for HID Signo reader firmware version 10.0.10.4:
  - Firmware updates to firmware version 10.0.10.4 via USB
  - Apply configurations to firmware version 10.0.10.4 via USB
- Added support for multiple keystores
- Added search and filter function to keystores and keysets
- Added support to apply offline configurations to Signo readers via HID® Mercury™ LP, MP, and HID® Aero® controllers
- Added support for additional offline/custom credential technologies, and for adding custom keys and referencing within a configuration:
  - Seos®
  - iCLASS® Legacy
  - iCLASS SR
  - iCLASS SE™
  - MIFARE Classic SE
  - MIFARE DESFire SE
- Added support to link HID Origo stored configurations with locally created configurations

1.3 Known issues

Version **SP7.5** and older must be upgraded to **SP9.1** before upgrading to **SP10.4**.
